

March 2025 Senegal AGEE Cross-national Dashboard

This dashboard is part of a series of cross-national visualisations that demonstrates how the AGEE Framework can be applied to explore gender equality in and through education using cross-national indicators collected in global data sets. The indicators were chosen based on specific criteria developed for the AGEE cross-national dashboard, which were agreed on through a participatory peer review process. However, they remain open to revision as more data becomes available. Please see the [Technical Note](#) on the 2025 dashboard page for more information on indicator criteria, the review process, and how the AGEE graphs were generated.

*Nd' indicates no data is available for this indicator in the cross-national datasets used to compile the spotlight countries. This appendix shows the full list of AGEE indicators for each domain and therefore notes when no data is available; however the indicators with missing data have been omitted from the graphs in the main section of the brief. For the 'domain graph' at the start of this brief, we will produce an average value for a domain if a country is missing data for up to two indicators, but we will not calculate an average if more than two indicators are missing. It is envisaged that more data will become available for most indicators as the SDGs move forwards. In future, it may be possible to impute data for these gaps from other sources at the national level. For further discussion of how the data was compiled for the spotlight briefs, please see the technical note ([Technical-notes-to-accompany-the-AGEE-SpotlightBriefs.3.pdf](#)).¹
